

PROJECT ENGINEER - STRATEGIC TEAM

TR Fastenings, part of Trifast plc, have 23 locations globally of which 7 are manufacturing sites. We supply Fastenings and Cat C product to over 50 countries globally and are recruiting for 2 key technical positions to support the ever growing needs of our customer base: www.trfastenings.com.

The Role

Proactive support for the Director of the Electronics and Technology sector on major projects. The ideal candidate would be a graduate engineer with a minimum of 2 years industrial experience. CAD and 3D modelling competence essential. This person needs to have a holistic approach, and be prepared to work with all disciplines including commercial and sourcing activities. This is a role that will be challenging and necessitates European travel. Competitive package based on core skills and previous experience.
