Fasteners for the Audio Industry

Cosmetically Outstanding Fasteners for the Audio Industry

ABOUT TR

Established in 1973, TR Fastenings is a multi-national manufacturer and distributor of industrial threaded fastenings with offices and factories around the globe.

Our Asian manufacturing network consists of six factories in China, Malaysia, Singapore and Taiwan which have a combined annual output of over six billion components.

We also have manufacturing capabilities in the UK as well as a global network of approved subcontractors allowing us to offer practically any size of turned, cold-formed, pressed or moulded components.

In addition to our manufacturing machinery, we also have our own in-house heat treatment furnace, vacuum sealer and packaging plant.

It's more than just a fastener!

We have been manufacturing and supplying fasteners to the audio industry for over 30 years and appreciate that while the quality and functionality of the fastener is important, it's more than that. They have to look cosmetically outstanding with no in-fills and be corrosion resistant.

The quality and finish of the fasteners reflects the quality of the overall product.

Our factory in Malaysia is specifically dedicated to manufacturing products for the audio industry and understands the need for high quality.

Product

In addition to fasteners for the audio industry, we manufacture and distribute a vast range of standard fasteners, specialist fasteners and mechanical components.

Distribution

We supply to over 50 countries from 16 locations in Europe, Asia and America and can offer a supply solution to suit you – from credit card sales through to full Vendor Managed Inventory systems.

Quality

ISO 9001:2000 • ISO/TS 16949

24 Hour Support

The TR Fastenings technical website has dimensional information on 1000's of products. This site also gives our customers access to the most comprehensive, free, fastener CAD library available. With over 20,000 configurations in the library, you can specify the exact size of fastener you require then download the correctly sized model in any one of 27 different 2D and 3D formats.

These include: AutoCAD, Catia, Pro/Engineer, SolidWorks, DXF, IGES and STEP.
