CFP SDL Free Spirit Fund - General Income Shares

A sub-fund of the Castlefield Funds

General Income Shares, ISIN GB00BYYQC495

Authorised Corporate Director - Castlefield Fund Partners Limited

Objectives and investment policy

The investment objective of the Fund is to seek to achieve real growth in capital and income over the long term. The Fund will invest mainly in a portfolio of UK equities listed on the LSE or quoted on AIM/ISDX and may also invest in other transferable securities, money market instruments, units and/or Shares in other collective investment schemes, deposits, warrants, cash and near cash.

Real growth means growth in excess of inflation, defined as the UK Consumer Price Index (CPI) +2% per annum on average and long term means over a minimum investment horizon of five years. It is likely that the portfolio will contain between 25 and 40 holdings when fully invested.

The Investment Adviser will adopt a focused approach to investing in the shares of those businesses with a clear and sustainable competitive advantages that are difficult to replicate, thereby erecting a barrier to new entrants and generating superior returns on operating assets. In addition, these companies are likely to possess sound finances and experienced management teams focused on the creation of long term value for shareholders.

The Investment Adviser will seek to invest in such companies at valuations which offer the potential for long term appreciation in income and capital value. If valuations are not deemed attractive, cash levels within the fund may rise until suitable investment opportunities are found. The Fund may also invest in derivatives and forward transactions (for efficient portfolio management purposes). The Fund may borrow and may enter into underwriting transactions in accordance with COLL.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund holds a concentrated portfolio of UK equities listed on the LSE or quoted on AIM/ISDX. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

The Fund is ranked as a 5 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

As there is less than five years of available data for this Fund, for illustrative purposes a similar type of investment has been used to calculate the risk/reward profile.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

One-off charges taken before or after you invest

For more information about charges, please refer to the Fund's prospectus..
